

LIGHT UP ST. LOUIS

February 24th, 2016
4pm - 9pm

Light Up St. Louis is a one-night event, produced by the local members of both the IES and IALD, celebrating the everyday places found throughout the City of St. Louis and the impact lighting can have on each to enhance their nighttime character. Four unique locations through the central corridor of St. Louis will serve as the events hosts, while teams of designers will work together with local electrical contractors to implement designs that will transform these places and spaces into extraordinary nighttime beacons.
